REASONS FOR ALLOWANCE

1. Applicant's arguments, see Remarks, filed April 5, 2007, with respect to the 35 U.S.C. 103 Rejection of Claims 1, 2, 7, and 8 over Azadet in view of Hatakeyama have been fully considered and are persuasive. The rejection of Claims 1, 2, 4, 5, 7, 8, 10, 11, 13, and 14 has been withdrawn.

2. The following is an examiner's statement of reasons for allowance:

The combined limitations of a best survivor unit where local winner states are chosen from 2^{K-2} pairs of odd and even states, respectively and a survivor memory comprising: a register-exchange network for receiving decision bits of 2^{K-1} states and generating decision vectors of survivor paths leading to said 2^{K-2} states at instant i according to said decision bits of said 2^{K-1} states from instant $i-L$ to instant i , wherein said 2^{K-1} states are divided into said 2^{K-2} pairs of odd and even states, said decision vectors of said 2^{K-1} states are output every L iterations, and each of said decision vectors has a length of L bits and and a trace-back unit for storing said decision vectors of said 2^{K-1} states and finding a global survivor path sequence by following said decision vectors back from the best state at instant $i-L$, such that L decoded bits are output every L iterations cannot be found in the prior art of record.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
